Experience

Sanofi Toronto, ON

AI Workflows Product Analyst, Digital Strategy and Operations Sep 2025–Present

- Led development of SupRM Intelligence for 61 suppliers and 34 Key Supplier Managers, reaching 80 Production users and 572 conversations in six months.
- Built an AI evaluation framework with 18 business scenarios and 25 checks, achieving a 97.9% Production pass rate and 100% tool compliance; reduced representative response length by 65%.
- Built reusable agent tools and orchestration reused by 6+ AI products across Budgeting, Risk, Compliance, Procurement, and Supplier Management.
- Piloted a workflow that turns supplier documents into proposed actions, resolves ownership, and requires human approval, creating an auditable action lifecycle.
- Developed weekly, monthly, quarterly, and annual supplier reporting, processing 1,822 historical records and generating 211 missing reporting periods without duplicates.

Digital Strategy and Operations Intern Sep 2024–Aug 2025

- Led License Patrol's redesign for 500+ applications, using AI and automation to support software optimization and contribute to €15M+ in savings redirected toward innovation.
- Defined requirements and mapped software-spend workflows with Finance, Procurement, Software Asset Management, and application owners, validating AI-assisted processes.
- Automated application classification, ownership resolution, contract synchronization, and onboarding, routing ambiguous cases through human review.
- Led 5+ product demos and feedback sessions, translating stakeholder input into product iterations, launch readiness, and adoption improvements.

Authentic Learning Lab, University of Toronto Remote

Project Development Lead May 2024–Aug 2024

- Led a cross-functional team of 5+ to design The Game of Social Life, a learning simulation showcased at the 2025 Human Flourishing symposium.
- Developed an accessible HTML/CSS/JavaScript interface and conducted user studies to refine game mechanics and improve usability.
